

WindowMax™

WINDOWS

We help you get the most from your home's design with well-crafted windows tailored to look great and engineered to last.

WindowMax™ Windows produce unique products that hold up to Manitoba's harshest climate. Exceptional quality and attention to detail result in giving our customers something they will be proud of, and windows that will stand the test of time.

WindowMax™ Windows are well built, look great and come with Energy Star certification making them perfect for your home.

Our casement hardware is designed to resist gear stripping, eliminating replacement cost and frustration.

Design Details

◀ **Easy Cleaning Tilt Feature**
A reinforced pivot bar and safety clip allows the window not only to slide but to tilt inward as well, making it ideal for easy cleaning.

◀ **Snap Lock**
Locks automatically when closed for maximum security and tight seal.

◀ **Drain Cap**
Drains any excess water away from the sill while keeping air and debris out.

▲ **Bottom Seal Deflector**
Propels rain and moisture down and away from the window base.

◀ **Structural Clip**
Locks into the main frame of the window and supports the sash under heavy wind loads. Clip will disengage from the frame in the open sash position.

Vented Drainage System

Patented vent and drainage system increases water expulsion.

Our hoppers are engineered to allow the maximum amount of light and ventilation into basements. They automatically snap-lock securely into place when closed.

The Benefits

- ALL our windows are ventilated for better water drainage
- Our insulated glass units have a failure rate of less than 2% over 50 years.
- We use only virgin PVC so our windows don't yellow and they last and last.
- Our windows come in more than 80 standard colours including innovative stains and custom matches.
- We even build in greater strength and rigidity by including multi-chamber construction.
