CASEMENT WINDOW

AWNING WINDOW

SINGLE HUNG &  
SLIDER WINDOW

PICTURE &  
FIXED WINDOW

BAY & BOW WINDOW

### VIRGIN P.V.C.

Our windows are extruded from virgin p.v.c. This means no recycled products that were broken down over time. A purer product which means no "yellowing" & more longevity for the life of the windows.

### DURABILITY

Casement and Awning Operator Series Feature powder coated steel on all exterior components for super smooth performance, unsurpassed quality, and superior corrosion resistance .

**WindowMax™**  
WINDOWS

### "THICK WALLED" PROFILE

We use superior vinyl frames and components. The design includes multi-chamber construction for extra rigidity and insulating value, along with heavy duty walls and double walls wherever screws are fastened.

### COLOUR OPTIONS

You can choose from our large palette of standard colours or have us custom match an existing colour. Colour matching is available for paint or stain, and our in-house paint facility can accommodate your request. .

## CASEMENT WINDOW

### EFFICIENT & ATTRACTIVE

Casement windows are hinged on the left or right of the frame and designed to open outward. When left open, they provide moderate protection from the elements on rainy days. They can also be made wider than casements which makes them ideal to maximize your view of the outdoors.

- Popular in kitchens and washrooms
- Attractive folding hardware
- Catch the breeze from both sides
- Includes full screen

## AWNING WINDOW

### EFFICIENT & ATTRACTIVE

Awning windows are hinged on the top frame and designed to open outward from the bottom. When left open, they provide moderate protection from the elements on rainy days. They can also be made wider than casements which makes them ideal to maximize your view of the outdoors.

- Popular in kitchens and washrooms
- Attractive folding hardware
- Catch the breeze from both sides
- Includes full screen

# SINGLE HUNG & SLIDER WINDOW

## TRADITIONAL & FUNCTIONAL

With a single hung window, the upper sash is stationary while the bottom slides up & down. The slider window is simply a horizontal version. Like all our windows, they are made using superior vinyl frames and components.

- Popular in Bedrooms & Kitchens
- Unique vented drainage system
- Easy cleaning Tilt Feature
- Child resistant tilt latches for added safety

# PICTURE & FIXED WINDOW

## AN UNOBSCURED VIEW

Our picture windows are a non-operating window to give you the most viewable area a window can give. Available in different shapes that can be used in combination with other window types. Our fixed windows again are stationary but designed to look like our operating windows to compliment window combinations while we maintain the maximum view available.

- Popular in Living Rooms where view is important
- Can be used in combination with other windows
- Available in different shapes

# BAY & BOW WINDOW

## EFFICIENT & ATTRACTIVE

Bay windows are windows that project outward from the main walls of a building and forming a bay in a room. Bays, traditionally comprised of 3 separate window units, while bow windows are made up of more units thus the word "bow" for the shape they make, typically combining four or more casement windows

- Popular in Living Rooms where view is important
- Can be used in combination with casements

# THE BENEFITS

WindowMax™ Windows are well built, look great & come with an energy star certification making them perfect for your home.

# Outside

## Beauty and Longevity

We help you get the most from your home's design with well-crafted windows tailored to look great & engineered to last. We're passionate about performance so you can be passionate about your home.

# Inside

## Comfort and Efficiency

WindowMax™ Windows hold up to Manitoba's harshest climate. Exceptional quality and attention to detail result in giving our customers something they will be proud of and windows that will stand the test of time.
